

LANDSCAPE COMPACT

Design: David Karásek, Viktor Šašinka

Un sistema di elementi di seduta che amplia la nostra gamma Landscape, un profilo laterale audace e il classico spazio tra seduta e schienale per una forma minimalista. Ogni singolo modulo orizzontale può essere combinato per formare sedili lunghi e unici con un mix di sezioni diritte e curve oppure è possibile utilizzarli come singole panchine nelle loro dimensioni standard. Nuovamente anche con braccioli.

Struttura d'acciaio zincato rivestito con verniciatura a polvere. Seduta e schienale sono costituiti da doghe laterali in legno massiccio. Le singole panchine e i complessi combinati si ancorano sul pavimento tramite viti.
