

# REFORMA

Design: Vrtiška & Žák

NEW

Di solito le trovi tra le ortiche distanti dai bei posti – brutte panchine con basi di cemento e semplici tavole di legno su cui sedere. Ecco un tentativo di interpretazione moderna di questo elemento trascurato. Rimane la semplicità e la linearità, aggiungendo raffinatezza di forma e finezza nei dettagli. Il risultato è originale, un design completamente contemporaneo ma visivamente vicino agli altri. Ci sono due varianti di panchine con schienale e una panchina senza schienale, possono essere assemblati in lunghe file o in un arco o cerchio, eventualmente installate su muretto.

Base massiccia in cemento in due tonalità unite da doghe in legno duro o trattato termicamente. Tutti gli elementi ausiliari in acciaio sono zincati o inox. La panchina può essere ancorata.
