

UFO

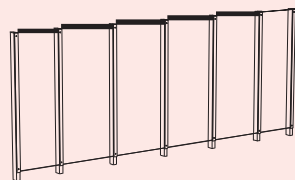

Design

David Karásek, Michael Tomalik

Elemento versatile per gli spazi pubblici, la pensilina UFO atterra con grazia su vari tipi di arredi urbani, offrendo un'alternativa ai normali ombrelloni con gamba centrale. La sua stabile struttura in acciaio elimina i problemi legati alle intemperie o agli atti di vandalismo. Può essere installato in parchi, passeggiate e aree semi-pubbliche in quasi tutti i spazi pubblici, senza bisogno di manutenzione quotidiana. Completato da una piattaforma circolare levitante, l'UFO offre uno spazio per un riposo tranquillo e indisturbato.
