BLOCQ

Design
David Karásek

Un blocco massiccio supportato da punte acuminate – in particolare contrasto ha l'effetto migliore in uno spazio pubblico. L'effetto è sottolineato dalle generose proporzioni della panchina. Queste proporzioni sono ancora più marcate se diversi moduli sono allineati creando lunghe file. C'è una variante senza schienale monumentalmente semplice e una versione pratica e comoda con schienale con sedili singoli a forma conica. Un'altra caratteristica speciale è una base in acciaio bicolore offerta in 6 combinazioni di colori. Entrambi gli accessori pratici e accattivanti per le panchine con schienale sono un robusto tavolo in acciaio destinato a contenere bibite, laptop o libri. Il colore di contrasto del tavolo porta anche un elemento giocoso in questa panchina. Il caricatore USB incorporato potrebbe essere utile per coloro che amano stare fuori un po' più a lungo. La retroilluminazione a LED disponibile per tutta la gamma di prodotti Blocq viene alla ribalta di sera.

BLOCCQ

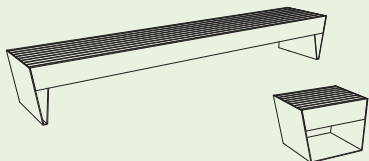

Telaio in acciaio massiccio zincato trattato con verniciatura a polvere. Doghe e lastre di legno formano la seduta e lo schienale. Sono collegati alla struttura d'acciaio in modo invisibile.
